Empty Inside

All That Remains

I can't show pain
Long for days
When I am free to feel

Don't want to lose everything
Just want to feel again
My heart would burst for you
If that would make things right

I don't feel anything
Outside the pain you bring
Starting over doesn't
Look so bad this time

I am not empty inside
Though I long to make this right

Emotions still touch me
Still I can't feel a thing
Like ghosts they melt into the fog
And leave me cold

Only shadows and impressions
Are left for me to hold
My heart would burst for you
If that would make you whole

I am not empty inside
Still I long, to make this right
I am not empty inside
Though I long to make this right

I am not empty inside
Still I long to make this right
I am not empty inside
(Empty inside)
Though I long, to make this right
(Make this right)

Don't want to lose everything
Just want to feel again
My heart would burst for you
If that would make things right

I don't feel anything
Outside the pain you bring
Starting over doesn't
Look so bad this time

I am not empty
I am not empty
I am not empty
I am not empty
