

Don't Forget Me

1927

How did you sleep last night?
Was it cold outside?
How can you be that way?
What will the people say?
Poor little orphan,
misunderstood little boy
The bus is leaving

By the barren road of a desert highway
The valleys sleep while the city screams
A sea of eyes like a rainbow shines on me

Don't forget me
Don't let them leave without me
Don't let them see me like this
It's not the way it should be
Your mama said you'd better leave it alone
Better leave it alone for good

How did you feel last night?
Did you sleep alright?
Why did you need to stay?
You never meant to play

Poor little orphan, misunderstood little boy
The bus is leaving

Don't forget me
Don't let them leave without me
Don't let them see me like this
It's not the way it should be
Your mama said you'd better leave it alone
Better leave it alone for good

Glory, glory, hallelujah

Don't forget me
Don't let them leave without me
Don't let them see me like this
It's not the way it should be
Your mama said you'd better leave it alone
Better leave it alone for good
