In the Dark

3 Doors Down

Whenever the lights go down That's when she comes alive Ooh ooh Maybe it's just something that you can only see in the night Ooh ooh A pretty little vixen dancing out on the scene But the lights are shining, so she's keeping it clean Don't get too close Boy, don't touch her skin Or you'll never feel the same way again

If everything you see is what you're believing Then she'll be holding your heart And by the time the sun goes down You won't know who you are She likes to do it in the dark She likes to do it in the dark, oh

Whenever the darkness comes, she'll have you right where she wants, ooh ooh Just when you think it's all over It's where it all starts It sounds like an angel is calling my name It might be the devil, but they all sound the same And all her moves won't let you get away She's gonna make your mind come with you to stay

If everything you see is what you're believing Then she'll be holding your heart And by the time the sun goes down You won't know who you are She likes to do it in the dark She likes to do it in the dark, oh

She likes to do it in the dark Oh oh, oh oh Ooh ooh

If everything you see is what you're believing Then she'll be holding your heart And by the time the sun goes down You won't know who you are She is gonna make you think you were leading But she had you from the start And by the time the sun goes down You won't know who you are She likes to do it in the dark She likes to do it in the dark She likes to do it in the dark, oh

Oh She likes to do it in the dark
