

You take a little bit of me
And a whole lot of you
Add it up together
And here's what you're gonna do
You gotta mix it up quick
And it'll blow up on this spot
I got a tell ya' that the place is getting hot

Now mix it up
Uh just mix it up
What the sum of all the parts
When you add it up
Make much more than what you had
I tell you what
It's like mad
The baddest thing that you've ever had, uh

I was never too good at math anyway
But when you add it up it comes out more I have to say
A lot of people looking for what you and me have found
And now it seems no one's around, uh

A little bit of me
And a whole lot of you
Add it up together
And here's what you're gonna do
You gotta mix it up quick
And it'll blow up on this spot
I got a tell ya' that the place is getting hot

Now mix it up
Uh just mix it up
What the sum of all the parts
When you add it up
Make much more than what you had
I tell you what
It's like mad
The baddest thing that you've ever had

We're just two misfits
That no one else gets
Everyone else in the place
Became a silhouette
Soon as there was you
It all comes in view
On my guitar
I see those sparks
When we have those conversations in the dark

I was never too good at math anyway
But when you add it up it comes out more I have to say
A lot of people looking for what you and me have found
And now it seems no one's around

A little bit of me
And a whole lot of you
Add it up together

And here's what you're gonna do
You gotta mix it up quick
And it'll blow up on this spot
I got a tell ya' that the place is getting hot

Now mix it up
Uh just mix it up
What the sum of all the parts
When you add it up
Make much more than what you had
I tell you what
It's like mad
The baddest thing that you've ever had

We're just two misfits
That no one else gets
Everyone else in the place
Became a silhouette
Soon as there was you
It all comes in view
On my guitar
I see those sparks
When we have those conversations in the dark
