Still Around

Go ahead and burn it down I'm drunk and so is everyone else in this devil town They won't let me turn around To get one last look at my baby

Well, she's still around Well, she's still around Well, she's still around Well, she's still around

Go ahead and build it up again This city's just cemeteries and forgotten In my only hopes to see you And even if I never do

Well, she's still around Well, she's still around Well, she's still around Well, she's still around

And I know what you're thinking But that won't stop this drinking It's the least I can do

'Cuz this life is anything but certain When they close the final curtain You'll get a glimpse of the truth

'Cuz you're still around Well, she's still around Well, she's still around Well, she's still around

Go ahead and burn it down I'm drunk and so is everyone else in this devil town
