

Taxi Cab Confession

40 Below Summer

Close your eyes and come with me to a new place
where we are unstoppable
Inhale and let the smoke fill your lungs and breath the impossible
And as we follow these foot prints a new world will begin
Can you feel it my brother-it's time to repent
Now can I get an amen! Why don't you come and ride with me
I can feel your pain, If you let me I'll save your soul
I'll take you away if you're with me
I'll make you whole amen
Now can I get an amen
And as we slowly separate from our worldly desires
we think the unthinkable
And we will swim together through the fire for we are unsinkable
And if you follow this path a new life will begin
Can you hear it my children it's time to confess
now, can I get an amen?
Confess, confess, digest and you will be saved by this
