

## Awaken To Winter

### A Whisper in the Noise

Awaken to winter  
Young child  
Here it has come  
Awaken  
My dear love  
A new day's begun  
Suffer the many  
Their labours undone  
So calm down, calm down, calm me down calm down

Awaken to winter  
Young child  
Your labours undone  
The elders around you  
No longer need laughter  
Or shrug

So calm down  
Calm down, calm me down, calm down

Distance yourself in presence  
To ghost of habit  
Deliverance hosts  
A severance thwart to pattern

Imagine a place made for us  
Far from it here  
Of far and rust  
So calm down, calm down, calm me down, calm down...
