

Heart Of The Country

ABBA

A candle burns in the
Heart of the country
The flame fades though
I see to it sadly
It takes me further away
than I have ever been

I wait and the darkness comes
I pray for my only one
And I wonder if you ever
Will see this land again

We took this land
And we brought it goodness
it's taken everything
And left only emptiness
I am not broken
Although I have the seeds in me

I wait and the darkness comes...

I hide my face against the sun
I hide my fear from everyone
But I've had enough of secrets
They're all lies
we're scared to tell
I just need someone to be with
I just need to say you fell

There's nothing out here
But me and a whisper
And now it's falling
I won't even listen
I watch the fall and it's
Time that I was leaving too

I wait and the darkness comes...
