

# I Got Something

ABBA

I got something  
You never never never had before  
I got something  
I never never never gave away before  
No other woman can give it to you  
No other woman can do what I do  
No other woman no no  
I got something

I know you've been around  
You've had your shares of ups and downs  
Been through too many lovers  
Had a taste but never a bite  
But look here  
What I got for you  
It's love and it's true true true  
I got something

I got something...

Some say you've seen it all  
that you were the first man on the moon  
that you got tired of flying  
and ended up not really doing a thing

You talk a lot about your friends  
How influential some of them are  
Forget your hot connections  
You don't have to sell it to me  
But look here  
What I got for you  
it's love and it's true true true  
I got something

I got something...
