

All the Way Down

Aethra

When you are all alone, and your getting so lost, when you feel there's no reason, to live anymore. When there's no one to talk, and you are all by your self, when the days seems too hard, and the nights have no end...when there's no one to listen, and nobody would care, when the road is not easy to walk it again, when your're waiting for something, that can light up your way, when your cry for somebody, that leaved you one day. When your falling to pieces, and your losing your strength, just hold on it wont last forever, when there's light in the mountains, and you're afraid to get there...then ill be with you, all the way down, through all the dark, and all the bad times, ill stay with you, all the way down, ill stand by your side, holding your hand... when your falling to pieces, and your losing your strength, just hold on it wont last forever, when there's light in the mountains, and you're afraid to get there...then ill be with you, all the way down, through all the dark, and all the bad times, ill stay with you, all the way down, ill stand by your side, holding your hand...
