

Fly Straight

Aidan Hawken

Call me anytime, I'll be right there for you
I'll lift you up when you are low, yeah
You help me to undo the selfish things I've done
I thought I was the only one, yeah

Fly straight to the sun
I feel like we've just begun
And only become

It tears me up each time I think of you
With him I only have myself to blame
And though it feels I lost my mind
You never were a waste of time

Fly straight to the sun
I feel like we've just begun
And only become

Fly straight to the sun
I feel like we've just begun
And only become

Come on and fly to the sun
Come on and fly to the sun
To the sun, to the sun, to the sun
