

## Everyone Gets A Star

Albert Hammond, Jr.

Won't you go back to where you go?  
I want you to, forever no  
These guys have all got problems  
These guys have all got their problems

Today, you've come now go away  
I know it gets so confusing  
Sometimes it all seems to drag me down  
And when I'm getting closer  
So close, everything just falls apart

When will you stop and see me through  
There's something else I'd rather do  
Although you're getting angry  
I know everyone gets a star

Today, you've come now go away  
I know it gets so confusing  
Sometimes it all seems to drag me down  
And when I'm getting closer  
So close, everything just falls apart
