## **Money Mile**

**Alison Moyet** 

Into your car park drive obsolete motors With petrol consumption at too higher price Sell us through windows at backroom board meetings Blindfolded and handcuffed and in single file

On your money mile We are the faceless, the nameless, the homeless On your money mile There in your fortress where you couldn't care less On your money mile We are the caseless, the raceless, the hopeless On your money mile You were caught in the crossfire hauling the flag right down

Send us to battle send us to the frontline Point us at the enemy Lest we forget It's for our protection that we lay here slaughtered It's for our survival we bury our dead

On your money mile We are the faceless, the nameless, the homeless On your money mile There in your fortress where you couldn't care less On your money mile We are the caseless, the raceless, the hopeless On your money mile You were caught in the crossfire hauling the flag right down

On your money mile ...
