International Anthem

All Star United

Listenin' to this I'm transcending English Something's bigger Than the national hymn

If you're thick, too thin Green, blue or pinkish Hum together with a cellophane skin A holy karaoke, prayer in stereo

Here it comes, here's to You An international anthem is overdue Here's to You

To the kings and queens And all the president's men It doesn't matter if you're strong King Kong

Lose the things Between yourself and Heaven And then, when you're ready You can hum along A holy karaoke, prayer in stereo From down here below

Here it comes, here's to You An international anthem is overdue

Here's to You From down to here below In gratitude from Coco to Moscow We hope you're pleased With these rhyme schemes And musical score like never before

Here it comes, here's to You An international anthem is overdue

Here it comes, here's to You An international anthem is overdue Here's to You
