

Radio Player

Allister

there's a broken needle scratchin my 45 collection
through a burned out, blown 2-speaker combination
there's nothin left to do but crank it up loud
it's pumpin through my head and it's knockin me out
it doesn't really matter what's goin on now
cause all i wanna do is
keep the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
there's a broken CD player in the backseat of my car
next to the pieces of what's left from my first guitar
there's nothin left to do but crank it up loud
it's pumpin through my head and it's knockin me out
it doesn't really matter what's goin on now
cause all i wanna do is
keep the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
we left the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
some people say
that my radio is dead
but i won't let myself believe it
we left the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
we left the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
we left the radio playin all night long
we left the radio playin all night long
because the radio's playin all my favorite songs
we left the radio playin all night long (the radio, the radio)
we left the radio playin all night long (the radio, the radio)
because the radio's playin all my favorite songs
(the radio, the radio songs)
