

# The Lady in Black

Amanda Lear

She arrived all alone in some exotic town  
Sexy lady, people say that she came from  
Rio or Singapore where she had left a man  
She loved the death before she shot him down

Watch out! Look out! For the lady in black  
Don't let her meet your man 'cause he'll never come back  
She's out every night for new delights  
Lady in black - lady in black

What is wrong? What is right? She can't tell them apart  
She loves men but she stabs them in the back  
It's no good try to fight, she's so cool and so smart  
She left a blazing trail of broken hearts

Watch out! Look out! For the lady in black  
Don't let her meet your man 'cause he'll never come back  
She's the lady who keeps her past in the dark  
Lady in black - lady in black

There's nothing like a lady  
Who keeps a little mystery in her life  
And put some magic in yours

Watch out! Look out! For the lady in black  
She destroyed many men, but she never comes back  
Herr kiss never miss, can you survive her?  
And she claims, hit and run, can be a lot of fun

Watch out! Look out! For the lady in black  
She's the talk of the town but she doesn't mind that  
She loves, she leaves and she forgets them  
Lady in black - lady in black.
