

Three Words

Amber Pacific

Don't wanna call you cause I miss you too much
Don't want to play cause I'm outta luck in this town, in this town
Tomorrow I'll be in another state
I get so nervous cause I just can't wait to see you
I guess I need you

Don't believe everything you read about me
(People talk, but it doesn't matter what they say)
I know you're always waiting for a status update
It comes a little too late

Can't stop thinking I'm to blame
Cause you're ready for the next one
The distance killed the burning flame
And I can't stop myself from trying to figure out
The fastest way to work this out
Cause I'm ready for you
Three words can't fix us anymore

I know you've (?) been working nine to five
I know you miss me, but you try to hide your feelings
Cause I gave you reasons

I remember when you took your breaks
You called to tell me all about your day
I miss that
Why can't we fix that

Don't believe everything you read about me
(People talk, but it doesn't matter what they say)
I know you're always waiting for a status update
It comes a little too late

Can't stop thinking I'm to blame
Cause you're ready for the next one
The distance killed the burning flame
And I can't stop myself from trying to figure out
The fastest way to work this out
Cause I'm ready for you
Three words can't fix us anymore

Can't fix us anymore...
Three words can't fix us anymore

Can't stop thinking I'm to blame
Cause you're ready for the next one
The distance killed the burning flame
And I can't stop myself from trying to figure out
The fastest way to work this out
Cause I'm ready for you
Three words can't fix us anymore
