

In Here

Ani DiFranco

Even when I look right at you
I always just see through
And I always just see new things to admire about you

Am I what you thought you were getting?
Does this love we make make you proud?
Does it look like it did on the menu
Minus, of course, the little dark cloud?

'Course when we signed up for forever
We had no idea it was in here
I guess always is all this and then some
I guess at least that much is clear
And whenever I look at you
You know, I always just see through
And I always just see new things to admire about you
