Chasing the High

Annihilator

Waking up to face another nightmare day Blood drips from the mouth, my teeth decay Deep depression is coming on fast Got to get me my crystal breakfast

High, chasing the high Die, chasing the high

High anxiety, panic setting in Will do anything to get the sin Sunlight burning my eyes gotta fill the need Methamphetamine, it's time to feed

Dying to feast
The monster is fed
Call for the priest
One more is dead

The chemical injection, rushing through the vein Speeding up the system and burning up the brain Powered and invincible, the pain is at an end High above, so beautiful, the demon rides again

Cycle starting over but it's too late Try it just one time, it seals your fate Deadly consequences, you can't go back Life is gone, a heart attack
