

# Never Deceive Me

Anvil

Got a strange situation  
I think that something's going down  
I hear it being whispered  
The rumour's out all over town  
You see I got a little lady  
Who I ain't been treatin' right  
It's a crime the way I'm acting  
I've been staying out all night

If it's not too late  
Try and change my fate  
All I need is you to stay with me

Now my drink is almost empty  
And I'll soon be on my way  
We have to talk about it  
It can't wait another day  
But I think that things are changing  
By the way she looks at me  
She keeps it all inside her  
And she thinks that I can't see

I was walking in the rain  
When I came upon the scene  
She was kissing him goodnight  
And I knew where she had been  
It changed my life completely  
And ever since that day  
You won't keep me close enough  
To hurt me in that way

'Cause when I saw you with that other guy  
You know it hurt me so down deep inside  
You'll never deceive me again  
'Cause when I saw you with that other guy  
You know you hurt me so down deep inside  
You'll never deceive me again
