

# Panacea and the Prelogue

Area 11

Wait inside  
By the fire and we'll talk a while  
I didn't mean to let the years go by  
Waiting for love

Have we come to terms  
With the lesson that our fathers learned?  
Impermanent, it flows away  
Everything goes away

I'd follow you, but not this time

So I walk in streets unknown  
Our bodies and their silver just a loan  
I'm sorry that I let you down, let you down, a lifetime ago  
I wanna say to all I leave behind  
And to those I'll never find  
That I need you to understand, understand, you're not on your own

Hold in mind  
What you value, is it worth the time?  
The only melodies that I could ever call mine  
Were friendship and lust

Will I feel absolved  
At the moment when we have it solved?  
A panacea for the absent soul  
Still it's never enough

I'd follow you, but not this time

So I walk in streets unknown  
Our bodies and their silver just a loan  
I'm sorry that I let you down, let you down, a lifetime ago  
I wanna say to all I leave behind  
And to those I'll never find  
That I need you to understand, understand, you're not on your own

For the art  
I will sing most anything  
We are worlds apart  
I can do it all

Lines fade out, but you illuminate  
The path back home, the path you've shown me  
As lines fade out, you will illuminate  
And lead a way back home

Lines fade out

For the art  
I will sing most anything  
We are worlds apart  
I can do it all
