

Something We Started

Arno Carstens

There's a virus in the circus
And the clown didn't hurt this
So much pain
Hurt it, hurt it

He was talking at a hundred miles an hour
Saying words that can only mend nations...

Something out of me
Something out of you
Something we started...

There's a virus in the Bible
It's called survival
And the children and the males and the females hurt it

He was talking at a hundred miles an hour
Saying words that can only mend nations...

Something out of you
Something out of me
Something we started

Something out of you
Something out of me
Something we started

It's something out of you
It's something out of you
It's something out of us
Something we started.
