softly through the air
Angels stars surround me
Seems like it's been forever
Think I just need a moment
Sorry I need reminding

I neverbeen so... trying please don't leave me behind We've become what we never wanted just like water and fire

... Softly beneath, I ignore all the edges aside me Holding myself so still, don't even feel the... You suddently start believing

 \dots Nothing to see is mine. We always do what we never need to The worlds we built they fire

We'll fall down down down We'll go down down down We'll fall down down We'll go down down
