

# The Flood

Asphyx

Neptune sends his servants of disaster  
His trident commands the howling winds  
Guides the hurricanes onto the lowlands  
Striking hard on the southern province

Wild waves ramming on entire coastlines  
The heavy storm comes in from the north west  
Maximum velocity of nature  
Elements seem to have coalesced

Levels exceeding  
Continuing downpour  
In combination of a tidal surge  
Roaring and raving  
Ravaging gates  
Conditions persist to emerge  
Signs of desperation  
Out of the mainland  
Vessels sending out their SOS  
Wreckages sinking  
Their fate was sealed  
Impossible to aid them with success

Defenses breaking  
Dikes crumbling down  
No longer able to resist the force  
Surprising havoc  
Widening gaps  
The conquering flood shows no remorse  
Villagers drowning  
Life stock swept away  
All communication broken down  
Lost road connections  
Buildings collapsed  
Disappeared and overflowed whole towns

Reconnoitering helicopters searching  
Delivering supplies and bags of sand  
Evacuating the dead and the living  
As the sea withdraws from drained inland
