

Shooting Star

Atom Smash

Through the oceans and the deserts
All across the earth
I've seen diamonds
I've seen pearls

I was in and out, lost and found
My own way to slow me down
Yes, I got what I deserved
Until the day the sky gave way

Then you fell to me like a shooting star
Found my lips to break your fall
Then you came my way like a brand new day
Felt you in my arms, said you're here to stay

I never wanted this
I never wanted like this before
My shooting star

Through the canyons and the rivers
The world was not enough
See I've made war
And I've made love

I was lost in space without a trace
The cigarettes that guide my way
Light me up and watch me burn
Until the night you cracked the sky

Then you fell to me like a shooting star
You found my lips to break your fall
Then you came my way like a brand new day
Held me in your arms, said you're here to stay

I never wanted this
I never wanted like this before
I know one day that you'll burn out
Until then the night is ours

Then you fell to me like a shooting star
You found my lips to break your fall
Then you came my way like a brand new day
Felt you in my arms, said you're here to stay
My shooting star

You fell to me, you're my shooting star
I broke your fall, you're my shooting star
You fell to me, yeah, I broke your fall
My shooting star, when you fell to me

I never wanted this
I never wanted like this before
