

## Put It Where You Want It

Average White Band

Put it where you want it  
That won't take much time  
We can make the best of it and I could make you mine  
Put it where you want it  
Bring your love over here ( bring it to me)  
One thing that I'm sure of honey, mine won't disappear  
Put it where you want it  
Lay it on the line, (lay it down) you can share your love around  
And I can share my time (I can share with nobody)  
Put it where you want it, well that ain't hard to do  
One man has to win your love, one of us has got to lose  
I've been searching the whole wide world  
But love like yours is so hard to find  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it, I just want you to know  
That won't take much time  
We can make the best of it and I could make you mine  
Put it where you want it  
Bring your love over here ( bring it to me)  
One thing that I'm sure of honey, mine won't disappear  
I guess there must be at thousand guys who want you  
But I'm the one who wants you the most  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it  
Put it where you want it
