Saw your eyes In the news Saw your tired face All your fear Blood and tears Couldn't buy your grace What I feel down deep inside is just my darker side of life You can hide from yourself but you can't hide from me A life for a life Want you to kill me, baby That's your only chance to survive A life for a life Can you hear the silence crying If I'm dead you stay alive I see pain , killing fields , see your misery When you're left by yourself - hear the sirens cry I'm the part of the world responsible for your fate If I could do something for you I would A life for a life I want you to kill me baby That's your only chance to survive A life for a life Can you hear the sirens crying If I'm dead you stay alive A life for a life If I'm dead you stay alive A life for a life I want you to kill me baby...
