

## Another Day

Axxis

Cold white frost melts on the green grass  
As the sun begins to shine  
As I wake up I was shure  
That the world is gonna be mine

The first bird starts to sing  
At the crack of dawn  
The world is telling me  
A new day is born

I feel the wind embracin' me  
I'm thankful that I get to see

Another day - to live and say  
I'm still alive - I've still survived  
Another day - to find a way  
For me to say  
I still got you on my mind

Golden colours everywhere  
The mornin' of my day  
Words I said - things I've done  
Are lost in yesterday

Like the sun find it's way  
Through the night  
You always fill my life with your light

Another day - to live and say  
I'm still alive - I've still survived  
Another day - to find my way  
For me to say  
I still got you on my mind

I feel the wind embracin' me  
I'm thankful that I get to see

Another day - to live and say  
I'm still alive - I've still survived  
Another day - to find a way  
For me to say  
I still got you on my mind
