

5th Dimension

B.o.B

Oh B.o.B,
What's up what's down,
Ladies and gentleman, we are entering into the 5th dimension,
And did I mention we gone, ah ah ah we gone, ah ah ah we gone
Right on right on, B.o.B. B.o.B give it to em

Girl I'm eons and eons beyond these peons, another human like me there will never be one,
The planet that I'm from, I can't even speak on,
The stars is what I sleep on, the moon I put my feet on
The way my aura glows you'd swear I'm made of neon, cooler than the free-on that's in your dodge neon
The say the futures now to me it hasn't begun, stay tuned to me and there here will never be a re-run
So come and leap on my body, and as we come you'll probably feel moist like the trees on the tropics
We gone, we out it, no we don't need rockets, we hop up on the mother ship and we gone, we slide it
We slippin' through dimensions, we hyperspace gliding, blasting through the atmosphere, fighting in the lightning
I know I'm out my mind girl, but you know you like it, so hop up on my cosmic highway so we can ride it

Shorty are you going my way, oh
Come on and ride on my cosmic highway
Oh, let's go, Oh, let's go
Look shorty I can't stay here on the earth no more
Another galaxy we must go

Fresh up out the sky I'm like a meteorite, so in the studio no I don't need to go write
I just came up in the game cause you needed more light, so, so by the time I'm done there won't be no more mics
And people ask me bob what kinda language is that, cause I be blastin' to the future, I may never come back
And I'm a leave with a 30 thousand light year leap, headed to a distant planet called B.o.B.
And then I'm gone, man they're not ignoring it, taking off from half court, air Jordan it,
All systems is go in 10 seconds I'm orbitin', hanging from the cosmos like a space ornament
Heat in my left pocket left hand, oh yea I bring the pain, similar to an asteroid that's headed toward your brain
My lane, is something that they really cannot explain, they try to hold me down but it's me they can't contain

Shorty are you going, my way, oh
Come on and ride on my cosmic highway
Oh, let's go, Oh, let's go
Look shorty I can't stay here on the earth no more
Another galaxy we must go
Come and go with me, I'll take you to my galaxy

I'm talking bout Venus, Venus, Jupiter, Jupiter, Mars, Mars
And I'm saying girl let's ride all night, and I need ya cause this ship love to take flight
Let's go, let's go, come on baby lemme take it off, another second we gon' blast it off

Look shorty are you going my way, oh
Come and ride on my cosmic highway
Oh let's go, Oh let's go
Shorty I can't stay here on the earth no more
Another galaxy we must go
