Stop for a moment Here's a message to you It's a call to us all The things we must do

Got the cause for our vision Got the force on our side When the sky is the limit When we go for the ride

Refrian:

Nothing can stop us
When we stand as one
When we come together
And we take on
We got it we got it we got it now
We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

Stop let me tell you Got to back on track It's a call to us all There's no turnin' back

I don't care what you've been doing I don't care where you belong From now on we're together Cause together we're strong

Refrain:

Nothing can stop us
When we stand as one
When we come together
And we take on
We got it we got it we got it now
We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
We got it we got it now

We got the power get ready to go

We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go We stand united the energy flows We got the power $\label{eq:constraint} % \begin{array}{c} \text{We got the power} \\ \text{We got the power} \end{array}$
