

Tonight Is The Night

Bad Boys Blue

She's the girl with the lonely eyes
So many tears, so many lies
Waiting for a dream come true
Brand new start for a broken heart
Someone real
Someone new
Could this girl be you?

Tonight is the night
Can you never never change your point of view?
Be true to yourself
Love is burning inside
Tonight is the night
Can you never never change your point of view
Be true to yourself
Love is burning inside
For tonight

Queen of the jet set, big blue eyes
No time to wait for the sun to rise
She takes what she wants and it's all right
She's number one in her book of life
Cold as ice
Heart of stone
Could this girl be you?

Tonight is the night
Can you never never change your point of view?
Be true to yourself
Love is burning inside
Tonight is the night
Can you never never change your point of view
Be true to yourself
Love is burning inside
For tonight
