

Loving You Out Loud

Bad Company

If I kissed you when you least expect it
And take you in my arms, just accept it
If I tell you you're what my life's about
I'm only loving you out loud

When I call you up on the telephone
And tell you that I'm feeling oh so alone
I wanna love you dear inside out(?)
I'm only loving you out loud

The times that we spent together
Are the best that I've ever known
No matter what the future may bring, baby
It's loving you from now on, oh baby

If I kissed you when you least expect it
And take you in my arms, just accept it
If I tell you you're what my life's about, yeah
I'm only loving you out loud

You know I'm only loving you out loud
