

# Come Back

Bananarama

Come Back

I haven't heard from you in a week

With my heart

I thought that we had something special

Come back my love to my heart

And finish what you started

Who's that knocking on my door

Could it be you coming back for more

Can I trust you to be true this time

Do you need some help in making up your mind

You leave me wanting this love that we share

So stop all this pretending that you don't care

Come back with my heart

Baby stay with me and finish what you started

Come back my love to my heart

You'll never get away until you finish what you started

When conversation turns to new romance

All you ever want to do is dance

I need a lover who can give and take

Someone who'll never make my heart break

Love is forever to always be there

So stop your running round and baby play fair

Come back with my heart

Baby stay with me and finish what you started

Come back my love to my heart

You'll never get away until you finish what you started

Don't take too long 'cos time races on

Baby please don't make me wait

Hey Yeah

You leave me wanting this love that we share

So stop your running round and baby play fair

Come back with my heart

Baby stay with me and finish what you started

Come back my love to my heart

You'll never get away until you finish what you started
