

## You Surround Me

Bebo Norman

There's never a day away from you  
I'm not a complete mess  
If I ever stay away from you  
It's only emptiness  
But love lasts longer  
And love stands stronger  
Than anything that's in between us  
There's never a day away from you

Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me

There's never a day away from you  
When I'm able to breathe  
Whatever this world is coming to  
I want you next to me  
Because love lasts longer  
And love stands stronger  
Than anything that's in between us  
There's never a day away from you

Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me

And I know the sun will rise and fall  
But we will make it through it all  
I will love you until life is over
