

The Longest Night

Bee Gees

You know a love so fine, so high above
Goes on forever but the road is rough
Reaching for another as truth will show
Try to live without it but you can't let go

We don't talk about it, we got no doubt
We can love each other when the lights go out
I got nobody, my bird has flown
Anyone can see I'm walking alone, walking alone

In your quiet moments, in your silent prayer
I'll be with you baby, I'll be there
In your darkest hour, on your longest night
I'll be with you baby, make it right
On your longest night

You know it breaks my heart and it hurts my pride
To know I lost you to the world outside
Feelings when you touch me, they rise and fall
Try to live without it, ain't no love at all

We don't talk about it but somebody knows
We can love each other when the candle glows
Open my eyes and the moment is gone
Anyone can see I'm walking alone, walking alone

In your darkest hour, on your longest night
I'll be with you baby, make it right

Nobody cries, nobody cries, cries
For the pain I feel
Nobody knows, nobody knows
And it makes me wanna die

In your quiet moments, in your silent prayer
I'll be with you baby, I'll be there
In your darkest hour, on your longest night
I'll be with you baby, make it right
On your longest night

Oh baby, so in love with you
It could be your longest night
Gonna be here all night, standing all night
Be your longest night

Gonna be here all night, standing all night, tonight
Gonna be here all night, standing all night
Gonna be here all night, standing all night
Gonna be here all night, standing all night

Be your longest, longest, longest night
Gonna be here all night, standing all night
Gonna be here all night, standing all night
Gonna be here all night, standing all night
