You know a love so fine, so high above Goes on forever but the road is rough Reaching for another as truth will show Try to live without it but you can't let go

We don't talk about it, we got no doubt
We can love each other when the lights go out
I got nobody, my bird has flown
Anyone can see I'm walking alone, walking alone

In your quiet moments, in your silent prayer
I'll be with you baby, I'll be there
In your darkest hour, on your longest night
I'll be with you baby, make it right
On your longest night

You know it breaks my heart and it hurts my pride To know I lost you to the world outside Feelings when you touch me, they rise and fall Try to live without it, ain't no love at all

We don't talk about it but somebody knows We can love each other when the candle glows Open my eyes and the moment is gone Anyone can see I'm walking alone, walking alone

In your darkest hour, on your longest night
I'll be with you baby, make it right

Nobody cries, nobody cries, cries For the pain I feel Nobody knows, nobody knows And it makes me wanna die

In your quiet moments, in your silent prayer I'll be with you baby, I'll be there
In your darkest hour, on your longest night
I'll be with you baby, make it right
On your longest night

Oh baby, so in love with you
It could be your longest night
Gonna be here all night, standing all night
Be your longest night

Gonna be here all night, standing all night, tonight Gonna be here all night, standing all night Gonna be here all night, standing all night Gonna be here all night, standing all night

Be your longest, longest, longest night Gonna be here all night, standing all night Gonna be here all night, standing all night Gonna be here all night, standing all night
