Magic Melody

[Verse 1] I'm walking through a land Of peace and harmony Come take me by the hand And join my fantasy This dream has just begun Come on and sing with me I know a certain song A certain melody goes [Refrain] La la la la la The magic melody goes La la la la la Come on and sing with me just La la la la la Oh, music is the key just La la la la la So it will set you free [Verse 2] I know it's just a dream It's not reality And not that what it seems I'm sure my mind is free Like lucy in the sky We just go on and on And fly our way up high Until the day is gone [Verse 3] You just got to hold on To what your heart believes You'll see you can't go wrong Inside this land of dreams We fly into the sun Across the milky way And sing our favorite song A rainbow shows the way just [Refrain] La la la la la The magic melody goes La la la la la Come on and sing with me just La la la la la Oh, music is the key just La la la la la So it will set you free
