

One Step To Infinity

beFour

Every little Stepp is slow and light
When you let it go just close your Eyes
A kind of magic

In the world of zero gravity
You will only need your fantasy
There is no tragic

It's one step to infinity
One step to Eternity
Just reach out and you will feel
This journey has no end
It's one step to infinity
Just one steo for you and me
A miracle that feels so real
Come and take my hand

Can you see the planets everywhere
Every single starlight here and there
It feels so magic

In my mind I'm in a galaxy
(I) dream myself a spaceship just for me
Escape from tragic

(2x)

It's one step to infinity
One step to Eternity
Just reach out and you will feel
This journey has no end
It's one step to infinity
Just one step for you and me
A miracle that feels so real
Come and take my hand
