

# You Came Out of Nowhere

Belinda Carlisle

I thought I heard a sound  
Somebody calling out to me  
So I turned around  
Strangers as far as I could see  
Drifting through this crowd  
Barely awake from last night's dream  
I call your name out loud  
I never thought you'd answer  
You came out of nowhere baby  
Just when I felt like giving up  
Do you know where I've been searching  
Everywhere this side of reality  
This side of eternity  
Why'd you take so long  
Man I thought you'd never get here  
I waited for the dawn  
Never finding you was my one fear  
It's dark before it's light  
And just when you can't believe your eyes  
Morning breaks bright and the storm is over  
You came out of nowhere baby  
Just when I felt like giving up  
Do you know where I've been searching  
Everywhere this side of reality  
This side of eternity  
You came out of nowhere baby  
Just when I thought it was all too much  
Do you know where I've been searching  
Everywhere this side of reality  
This side of eternity  
It might have rained for the rest of my life  
But you came along  
It could have been pain for all of these nights  
But you came to stay  
You came out of nowhere baby  
Just when I felt like giving up  
Do you know where I've been searching  
Everywhere this side of reality  
This side of eternity
