

I'll astrally project myself into the life of someone else
I'll astrally project myself into the life of someone else
I'll astrally project myself into the life of someone else
I'll astrally project myself into the life of someone else

I'll astrally project myself into the life of someone else
I'll astrally project myself into the life of someone else
someone else

I'll astrally project myself into the life of someone else...

As the day resolves to night I notice
I have made my world go out of focus (someone else)

I'll astrally project myself into the life of someone else...

As the day resolves to night I notice
I have made my world go out of focus (someone else)

I've been through the best of times
that didn't even touch the sides
I've been through the worst of times
that never even came to light, came to light

I've been through the best of times
that didn't even touch the sides
I've been through the worst of times
that never even came to life, came to light

I've been through the worst of times
that never even came to life, came to light
(As the day resolves to night I notice
I have made my world go out of focus)
Oh....

I'm getting high
I'm getting high
getting high
off your star...

You are all aglow
In the smoke and snow
You are all aglow
In the smoke and snow
You are all aglow
In the smoke and snow
