## She Doesn't Need Saving

## **Beverley Craven**

It's easier here on the outside Telling her what we'd do If fate put us in her position If we were stood in her shoes

But destiny's already written And she has to learn to survive So leave her to make those decisons And take back control of her life

She doesn't need saving She's not given up yet All she needs is our faith To replace her regret And help her forget

So give her some time to grow stronger And let her decide what to do She's been through so many changes And right now she's still confused But when she's discovered the answers And she doesn't feel so afraid She'll have the power of wisdom And no one can take that away

She doesn't need saving She's not given up yet All she needs is our faith To replace her regret And help her forget The past and the pain And try to start over again 'Cos she knows Where she wants to go So leave her alone And trust her to find her own way

She doesn't need saving She's not given up yet All she needs is our faith To replace her regret And help her forget
