## **Perfect Dark**

## **Beyond Twilight**

I see beauty I feel love But when I touch it I burn Deep is the sky White is the sea But windows and doors have been closed For so long And it's perfect dark It's perfect dark here Where the angels scream Give me a reason What's this all about? I am sorry I don't understand We pray to our God as we dance with the Devil Hold the candle Pass the flame We're all in this together Cosmic winds are gathering Coming your way Telling you - you are only a fragment A fragment of time And it's perfect dark It's perfect dark here Hear the angels screaming I can't go on carrying the pain Follow the philoso pher Is he God or Lucifer? It's written in the sky A prophecy for you and I Electrical insects With nowhere to go Asking the question why Religion might just be a lie Believer, take your fix Crawl up on your crucifix I've found the answer I have the key Experience reality And the world will see That it's perfect dark It's perfect dark here In the Devil's hall of fame Before me now I see a dying planet Captured souls With microchips implanted And it's perfect dark In the Devil's hall of fame There must be a way I'm waiting - waiting for the day Hellfire Hellfire Higher Higher Only blood remains There is nothing more to gain
