

All I See Is You

Big Star

You were my friend
And in the end
The sea of time it's better than today
And still it seems
I've lost my dreams
the whole world knows it won't work out that way
I look at you
I see you through
A different light that's shining down on you
It won't be long before I'm gone
Someone, somewhere, says it's time to go
I want you, please come home

All I see is you

You were my friend
I did you in
We saw a time that's better than today
And still it seems
I've lost my dreams
The whole world knows things just don't work that way

All I see is you
