Bring It On

Billie Piper

It's not enough to say you think of me
It's not enough to wanna be here in my arms
It's not enough to call me every night
I need to see you
Need to hold you in my arms

If you're serious
More than curious
You gotta go for it
You gotta pick a place to start

Bring it on, bring it on
Show me how it's gonna be
Bring it on, bring it on
Cos if you wanna be with me
I'm not about to wait around
You gotta let your love come down down down down
Bring it on, bring it on
Down down down down

Stop contemplating, baby
Can't you see
I never said we were not gonna take it slow
I'm not asking for a diamond ring
Just a chance of sometime to get to know

If you're serious
More than curious
You gotta go for it
You gotta pick a place to start
If you wanna get serious more than curious
You gotta go for it
You gotta pick a place to start

Bring it on, bring it on
Show me how it's gonna be
Bring it on, bring it on
Cos if you wanna be with me
I'm not about to wait around
You gotta let your love come down down down down

Bring it on, bring it on
Show me how it's gonna be
Bring it on, bring it on
Cos if wanna be with me
I'm not about to wait around
You gotta let your love come down down down down
Bring it on, bring it on

You and me could be so good together
I'll take all your fears away
You won't feel the pain
What more can I say, oh

Bring it on, bring it on
Show me how it's gonna be
Bring it on, bring it on

Cos if wanna be with me
I'm not about to wait around
You gotta let your love come down down down down
Bring it on, bring it on
