

By My Song

Billy Dean

By my song you'll know the heart that's in me
By my song you'll know that I am here
Just words and notes together, but long after I'm gone
You will know I loved you by my song

By my song you will always be remembered
You'll live on just as you are right now
Your eyes won't lose their sparkle to the ages they'll belong
The world will know I loved you by my song

In these simple rhymes of mine
You will stay till the end of time
And in this tune where love abounds
Well, someday you'll come back around

By my song, as long as love is not forgotten
On and on we'll sail beyond the years
Just words and notes together, to the ages they'll belong
The world will know I loved you by my song
And you will know I loved you by my song
