Make It Through

I promised that I would The same day every week Be guided how to be Important we meet

I'll listen as you teach Just follow, chant and learn Sign here you must repeat I'm so much better

They turn look round at me Now we all look the same Eight a.m every day I knew I could change

Will never miss a point Counting throughout the day It's me now that they want I'm so much better

Not all make it through you know Not all make it through

My future's guaranteed What were you thinking of Four years try be like me You must regret it
