

# When I Go Down On You

Black Francis

We have confusion  
and we're weary from the words  
And baby please I know  
I'll get through  
When i go down on you  
When i go down on you  
We'll be happy and free just as the birds  
I don't need to have some money  
And I don't need to have some friends  
I dont need to have somebody new  
When i go down on you  
When i go down on you  
With you all things I will transcend  
As the universe explodes  
And the world goes straight to hell  
And some people try to split our love in two  
I'll go down on you  
I'll go down on you  
No there's nothing could ever break this spell  
I don't need to know the answer  
I don't need to save my soul  
And i don't need to have a point of view  
When i go down on you  
When i go down on you  
To be with you has been my only goal  
If you wonder who will love you  
And will have a tender touch  
Then please allow for me to give a clue  
I'll go down on you  
I'll go down on you  
Theres nothing in this world I love as much  
Theres nothing in this world I love as much
