

Thin White Lie

Black Lab

You get me high one last time
One more second to let you save my life
'Cause I don't need it, need it anymore
O my darling, here we go

You get me high in that long white summer dress
Take it off outside in the long green grass
I don't need it, need it anymore
But it feels so good, o my Lord

Talk about it, take the long way 'round
Come on angel, there's only one way out
One way, you can make it easy
Just walk away now baby
One way, make it easy on me
Walk away now, away now

Are you a siren? You call me out
You make it hard on me, it's hard to turn you down
But I don't need it, need it anymore
So keep your distance, o my Lord

Talk about it, take the long way 'round
Come on angel, there's only one way out
One way, you can make it easy
Just walk away now baby
One way, make it easy on me
Just walk away now, away now, please

Only one way out
One way, you can make it easy
Walk away now baby
One way, make it easy on me
Walk away now, away now, yeah

One way, there's only one way now
Just walk away now baby, please
One way, you can make it easy
Just walk away now, away now please
