

# Nothing Without You

Boyzone

On the cover stone streets on the summer lights  
Taste the salt and the breeze as it blows by  
All the sand is as white as snow  
Hear the waves as they race to the finish line

See the water sparkling diamond like  
Every cloud must have stayed at home  
Oh the sun is a fire in the sky and it's blazing  
All the colors it makes as it falls to the sea  
So amazing  
Yoo yoo

It ain't nothing without you  
Through your eyes everything is so beautiful  
Didn't know love could be this incredible  
And I feel so alive when you touch me  
Every stars seems to shoot through the sky like is landing  
And the moon is so close and it's shining so bright that it's blinding  
Yoo, yoo yoo

It ain't nothing without you  
On the cover stone streets in the summer lights  
Taste the salt and the breeze as it blows by  
All the sand is as white as snow  
It ain't nothing without you  
If you weren't in my world  
All the days and the nights would still be black and white

It ain't nothing without you  
On the cover stone streets on the summer lights  
Taste the salt and the breeze as it blows by  
All the sand is as white as snow.
