## In My Own Eyes

**Brandi Carlile** 

Hold me down lift me up There's someone on the bedside waiting there for me I hear my name, turn around There's gotta be a downside, something I don't see Around me Hide me Dying in the light of the room Blind side please I don't really want to be seen In my own eyes Something's wrong Awake all night 'Cause I can feel the dark side Closing in on me Do you see me As I see myself? I promise there's a downside Something you can't see Hide me Dying in the light of the room Blind side please I don't really want to be seen In my own eyes Lost in translation Free to fall One situation And lose it all Hide me Dying in the light of the room Blind side please I don't really want to be seen Hide me Dying in the light of the room Blind side please I don't really want to be seen I don't really want to be seen In my own eyes
